

SAMKIT INFOSYSTEMS DATASHEET

Configuration Migration

Automate Oracle Cloud configuration transitions

This solution accelerates the transition from legacy systems to Oracle Cloud Applications by automating traditionally manual tasks such as configuring a new environment. It also supports migrating configuration from one environment to another.

- Automated configuration migration across Oracle environments
- Supports new environment set-up acceleration
- Legacy-to-cloud configuration transition workflows
- Reduces human error in manual configuration tasks
- Detailed migration logs and audit trails
