Ensure Compliance with Automated Financial Data Extraction For Oracle Fusion

GoBD Audit Report

GoBD Audit Report is a specialized cloud-based solution designed to help businesses comply with Germany's GoBD (Principles for Proper Management and Storage of Books, Records, and Documents in Electronic Form). It enables automated extraction of financial data from Oracle Fusion, ensuring transparency, audit readiness, and compliance with regulatory requirements.

Why GoBD Audit Report?

- **Fully Aligned with GoBD Standards** – Meet tax authority expectations with ease.
- **Eliminate Manual Work** – Automate the extraction and formatting of financial records.
- **Fast & Secure Data Processing** – Save time while ensuring accuracy and security.
- **Continuous Updates & Support** – Stay compliant with evolving regulations.

Get Started Today!

Simplify your GoBD compliance with the GoBD Audit Report.

Key Features

- **GoBD-Compliant Data Extraction** – Automate the retrieval of structured financial records from Oracle Fusion.
- **Standardized Audit Reports** – Generate reports that meet German tax authority requirements.
- **Multiple Export Formats** – Export data in XML, CSV, and other GoBD-compliant formats.
- **Custom Query Support** – Extract specific datasets for audit and compliance.
- **Data Integrity & Security** – Ensures compliance with encryption and audit trails.
- **Cloud-Based Access** – Retrieve reports anytime, anywhere.

Use Cases

- **GoBD Compliance** – Ensure your business meets German tax documentation regulations.
- **Financial Audits** – Automate financial data extraction for external and internal audits.
- **Tax & Regulatory Reporting** – Generate accurate reports for tax authorities.
- **Data Retention & Integrity** – Maintain structured records for long-term compliance.
